General education nurtures in students the knowledge, skills, habits of mind, and values that provide a foundation for their baccalaureate program and for lifelong learning. General education fosters intellectual breadth, serves as a context for more specialized study, and is essential to the full development of persons who wish to participate meaningfully in the various communities of which they are apart.

Given these goals, we endorse the following Educational Outcomes in the areas of Knowledge, Skills, and Citizenship. We recognize that certain specific aspects of these outcomes will be discipline specific, and we expect that the level of competence in each area will be defined and assessed according to the individual disciplines. The recommendations for core courses and other curriculum changes should be informed by these general outcomes. As programs develop, changes, deletions, or additions may be necessary, and this document outlines a process for making those changes.

For additional help, please contact Catalog Support.

1. Selecting a Different Catalog

There may be more than one catalog available from the University of Arkansas at Little Rock system e-catalog Gateway at a time. If there is more than one, you will see a dropdown box toward the top of the page with the name of the current catalog. Clicking the dropdown box provides access to other available catalogs. Selecting an alternate catalog will load it into the Gateway. If you do not see the dropdown box, then only a single catalog is currently published.

You may add information from any of the available catalogs to your own personal Bookmarks. See below to learn more about Using the Bookmarks Feature.

2. Searching the Catalog

The Catalog Search (shown at the top of the navigation) allows quick retrieval of catalog content that matches your interests.
